

For 25 years, Alliance Consulting has been supporting those who are shaping the industries of tomorrow. From our offices located at the heart of the innovation center dedicated to cutting-edge technologies, Unlimitrust Campus in Prilly, we are actively involved in an ecosystem driven by digital trust, serving cybersecurity and advanced technology players in their growth challenges.

As a pioneering firm present across the entire value chain, we advise executives and senior experts by placing people and professional expertise at the core of every assignment.

Today, we are supporting an innovative company, a leader in the Trust Tech sector, specializing in digital security and privacy management. Based in the Lausanne region, it develops cutting-edge solutions to ensure data protection, secure transactions, and digital trust for its clients through blockchain, authentication, and identity management technologies.

With continued growth, it is looking for a

Chief Information Security Officer (CISO)

You will be responsible for defining and implementing the organization's information security and risk management strategy. You will play a key role in protecting its infrastructures as well as those of its clients, ensuring a secure digital environment that complies with international standards.

Your responsibilities:

- Develop and lead the company's information security strategy in close collaboration with executive management.
- Oversee the IT security teams and ensure their effective operation.
- Ensure compliance with applicable regulations (GDPR, ISO 27001, etc.) and anticipate regulatory developments in the field of data protection.
- Identify, analyze, and manage risks related to information systems security and sensitive data.
- Define and implement robust security policies to protect the company's, clients', and partners' data.
- Coordinate incident response and manage crises in the event of security breaches.
- Promote a security-first culture at all levels of the organization and provide regular training to employees.
- Collaborate with technical teams to integrate innovative security solutions into products and services..

Your Profile:

- You hold a Master's degree in computer science, cybersecurity, or a related technical field, with at least 10 years of experience in information security, including several years in a leadership role.
- You have strong expertise in cybersecurity, risk management, data protection, and regulatory compliance.
- You are comfortable working with international security standards, particularly in the areas of blockchain, authentication systems, and identity management solutions.

- You have proven experience in managing multidisciplinary teams and implementing security solutions within technology-driven companies. A CISSP, CISM, or ISO 27001 certification would be a strong asset.
- You are fluent in French and English; knowledge of German would be an advantage.

What our Client offers:

- **Dynamic environment:** Join a company at the forefront of innovation, operating in the fast-growing Trust Tech sector.
- **Exciting challenge:** Implement next-generation security solutions to protect our clients' sensitive data.
- **Quality of life:** Work in the beautiful Lausanne region, combining professional opportunities with an exceptional living environment.
- **Attractive compensation and competitive benefits,** as well as the opportunity to contribute to large-scale projects.

Are you passionate about cybersecurity and eager to contribute to innovation in the Trust Tech field?

Let's connect without delay!
